Arizona State Land Department Technical Evidence for the Santa Cruz River in Santa Cruz County

The Arizona State Land Department's technical evidence for the Santa Cruz River is the "Arizona Stream Navigability Study for the Santa Cruz River: Gila River Confluence to the Headwaters, Final report," by SFC Engineering Company, in association with George V. Sabol Consulting Engineers, Inc., JE Fuller/Hydrology & Geomorphology, Inc., SWCA Inc. Environmental Consultants, University of Arizona Water Resources Research Center, and the Arizona Geological Survey, November 1996. Even though this report was written before the inception of the most recent bill, Senate Bill 1275, the technical evidence stands on its own. This report was previously submitted to the Arizona Navigable Streams Adjudication Commission (ANSAC).

In addition, the following agencies were contacted for new/supplementary information: The Arizona Department of Game and Fish, Arizona Department of Water Resources, Arizona Department of Environmental Quality, Arizona State Parks, United States Fish and Wildlife Service, and the Water Resources Research Center at the University of Arizona. No new information was turned in.

The Arizona State Land Department would like verbage to be excluded that reflects the prior bill, House Bill 2589, on the following pages: 1 and 11 in the Executive Summary, 3-5, 8, and Appendix A in Section 1, and 1-7 in Section 6.

Sincerely,

A handwritten signature in cursive script that reads "Cheryl K. Doyle".
